TEST TEXT

- 1> IT was still shocking to M. how much a few wrong turns could change your
1> life. She had graduated from Boston College witha [with] a degree in
1> psychology, married ata [at] twenty-five, and had two children, a
1> son _ [and] a daughter. She and her family settled in a town on
Massachusetts' southern shore. She worked for thirteen years in
2> healthh [health] care, becoming the director fo [of] a residence program
1> form [for] men who'd suffered severe head injuries. But she and her
husband began fighting. There were betrayals. By the time she was
thirty-two, her marriage had disintegrated. In the divorce, she lost
possession of their home, and, amid her financial and psychological struggles,
she saw that she was losing her children, too. Within a few years, she
was drinking. She began dating someone, and they drank together. After a
1> while, he brought some drugs home, ans [and] she tried them. The drugs
got harder. Eventually, they were doing heroin, which turned out to
2> be readily availabel [available] from a street deale3r a block away
1> from her apartment.[.]
- 1> One day, shge [she] went to see a doctor because she wasn't feeling well,
1> and learned that she had contracted H.I.v. from a contaminated needle. She
1> had to leave he [her] job. She lost visiting rights with her children. And
2> she developed complications from the H.I.V.[.] including shinhles, [shingles,]
which caused painful, blistering sores across her scalp and forehead. With
1> treatment, though, her _ [H.I.V.] was brought under control. At
1> thirty-sixd, [thirty-six,] she entered rehab, dropped the boyfriend, and
kicked the drugs. She had two good, quiet years in which she began
1> rebuilding her life. Then she got the itch.[.]
- 2> It was right afrter [after] aa [a] shingles episode. The blisters and
the pain responded, as they usually did, to acyclovir, an antiviral
medication. But this time the area of the scalp that was involved became
1> numb, and the pain was replaced by a constant, relentless itchl. [itch.]
